## REPORT & SUMMARY

DEXTOR | JAN24

# Fourlead DISC Overview

**Company** Mobi Asia  
**Position** Intern

**Name** Dextor  
**Date** Jan 2024

## Introduction:

The DISC model is a psychological theory that categorises individuals into four primary behavioural types, each representing a unique set of behavioural traits. The four types form a different sets of orientation as shown below.

## Change tendency

Workplace behavioural assessments may change based on external factors like work environment, role, colleagues, superiors, structure, and culture. The speed of change depends on the intensity of the stated factors. It is important to understand that there's no best trait and no one trait better than the others.

## Fourlead DISC Result & Summary

Based on your workplace behavioural assessment, below is the summary of the results.

### Public Behaviour:

### Public behaviour:

Refers to how individuals conduct themselves, communicate, and interact with others in settings that involve a larger group or the general public. It encompasses behavior in professional environments, social gatherings, and any situation where interactions are visible to others.

### Characteristics:

- Observable by others.
- Influenced by societal norms and expectations.
- Typically more formal and controlled.
- May involve conscious efforts to project a certain image.

Based on your workplace behavioural assessment, below is the summary of the results.

## Private Behaviour:

## Private behaviour:

Pertains to how individuals behave when in more intimate or personal settings, where the audience is limited to a smaller, more familiar group or when alone. It reflects an individual's true self, including thoughts, feelings, and actions in a more relaxed and authentic manner.

## Characteristics:

- Not always observable by others.
- Reflects an individual's authentic self.
- Less influenced by external expectations.
- Can be more relaxed, spontaneous, and genuine.

Based on your workplace behavioural assessment, below is the summary of the results.

## Perceived Behaviour:

## Perceived behaviour:

Refers to the way in which an individual is viewed or interpreted by others based on their observable actions, communication style, and interactions. It involves external impressions formed by others about an individual's conduct, attitudes, and demeanor.

## Characteristics:

- Shaped by the observations and interpretations of others.
- May not always align with the individual's intentions or self-perceptions.
- Influenced by the context and the observer's perspectives.
- Important in interpersonal dynamics and team collaboration.

Your DISC score chart is based on your assessment result.

## Chart interpretation

### High DISC Scores:

- **Dominance (D):** Individuals with high D scores prefer assertiveness, decisiveness, and a results-driven approach, often viewed as assertive leaders who enjoy taking charge to achieve goals.
- **Influence (I):** Suggests a sociable, outgoing, and persuasive nature. Individuals with high I scores often thrive in social settings, enjoy collaboration, and are effective communicators.
- **Steadiness (S):** Reflects a patient, team-oriented, and stable approach. Individuals with high S scores contribute to team harmony, prefer stability, and excel in supportive roles.
- **Conscientiousness (C):** Indicates a detail-oriented, analytical, and systematic approach. Individuals with high C scores value precision, follow procedures and excel in roles that require attention to detail.

### Low DISC Scores:

- **Dominance (D):** Implies a more reserved, collaborative, and less assertive style. Individuals with low D scores may prefer collaborative decision-making and a more supportive role within a team.
- **Influence (I):** Suggests a more reserved or introverted nature. Individuals with low I scores may prefer quieter environments and might not seek the spotlight in social situations.
- **Steadiness (S):** Indicates a preference for change, variety, and a faster pace. Individuals with low S scores may be more adaptable and comfortable in dynamic or fast-paced environments.
- **Conscientiousness (C):** Implies a more flexible and spontaneous approach. Individuals with low C scores may be comfortable with ambiguity, prefer creativity over structure, and may be more adaptable to change.

It's important to understand that a high or low score in a particular dimension of the DISC profile doesn't necessarily mean better or worse behavior. Each score represents a different set of strengths and preferences, and a well-rounded team can benefit from a diverse range of DISC profiles. Therefore, it's important to appreciate and respect the unique contributions that every team member brings to the table.

## DISC Compatibility

In the DISC model, individuals with high traits in one dimension may have specific tendencies when interacting with others who also have high traits. Here's a general overview of how individuals with high traits might work together, described in terms of cohesive, neutral, or tense interactions:

*Tick according to the individual's private score.*

| Primary Traits                                        | With D                                                                                       | With I                                                                                      | With S                                                                                      | With C                                                                               |
|-------------------------------------------------------|----------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|
| <input type="checkbox"/> <b>Dominance (D)</b>         |             |            |          |   |
| <input type="checkbox"/> <b>Influence (I)</b>         |             |            |          |   |
| <input type="checkbox"/> <b>Steadiness (S)</b>        |             |            |          |   |
| <input type="checkbox"/> <b>Conscientiousness (C)</b> |            |           |         |  |
|                                                       | Cohesive  | Neutral  | Tense  |                                                                                      |

It's important to keep in mind that these are general tendencies and that each individual may display a mix of traits. Successful collaboration is achieved through effective communication, understanding, and appreciation of diversity, regardless of DISC profiles. The key to creating a balanced and effective team dynamic is to recognize and leverage the strengths of each trait.

*Note: Neutral compatibility may turn tense if the collaborated individual is displaying excessively primary traits as stated below:*

**D:** Fast-paced and assertive nature.

**I:** Too talkative or less focused on immediate results.

**S:** Too slow-paced or resistant to change.

**C:** Overly cautious or focused on details.

**Individual's recommendation** [tick private score]

High and low DISC scores have corresponding recommendations to help individuals succeed professionally. These are general suggestions and individuals may exhibit a combination of traits. Here are some recommendations for high and low scores in each dimension. *Tick according to individual's private score.*

☐ **High Dominance (D) Score**

- Leadership Development:
  - Engage in leadership development programs to enhance your natural assertiveness.
  - Seek opportunities to lead projects or teams to utilise your decision-making skills.
- Effective Communication:
  - Be mindful of others' communication styles and adapt to ensure clear and effective communication.
  - Encourage open communication, providing clear directives without appearing overly directive.

☐ **Low Dominance (D) Score**

- Confidence Building:
  - Engage in activities that build self-confidence and assertiveness.
  - Gradually take on leadership responsibilities to enhance leadership skills.
- Team Collaboration:
  - Emphasize your collaborative strengths within a team setting.
  - Seek opportunities for team-building activities to strengthen interpersonal skills.

☐ **High Influence (I) Score:**

- Effective Networking:
  - Leverage your networking skills for professional growth.
  - Use your ability to connect with people to build strong professional relationships.
- Focus on Results:
  - Channel your social skills towards achieving results and influencing positive outcomes.
  - Balance social interactions with a focus on achieving tangible goals.

☐ **Low Influence (I) Score:**

- Networking Opportunities:
  - Gradually engage in networking events to build social skills.
  - Emphasize your expertise and knowledge in professional settings.
- Focused Communication:
  - Communicate with a focus on facts and details.
  - Develop strategies to present your ideas in a clear and concise manner.

## **Individual's recommendation** [tick private score]

### ☐ **High Steadiness (S) Score:**

- Conflict Resolution Skills:
  - Leverage your patience and calm demeanor in conflict resolution.
  - Focus on maintaining team harmony in challenging situations.
- Project Management:
  - Engage in projects that require stability and consistency.
  - Use your ability to create a stable work environment to your advantage.

### ☐ **Low Steadiness (S) Score:**

- Adaptability Training:
  - Develop strategies for adapting to changing circumstances.
  - Seek opportunities to engage in dynamic projects that challenge your adaptability.
- Flexibility in Tasks:
  - Embrace tasks that require quick thinking and adaptability.
  - Gradually expose yourself to more varied and fast-paced projects.

### ☐ **High Conscientiousness (C) Score:**

- Detailed Planning:
  - Continue to utilise your detailed planning skills for project success.
  - Ensure that your organised approach aligns with project requirements.
- Flexibility Management:
  - Recognize the need for flexibility in certain situations.
  - Develop strategies to adapt to unexpected changes without compromising quality.

### ☐ **Low Conscientiousness (C) Score:**

- Project Innovation:
  - Embrace creativity and innovative thinking in your projects.
  - Explore opportunities to introduce new ideas and approaches.
- Organization Strategies:
  - Develop organisational strategies that suit your unique style.
  - Partner with individuals who excel in detail-oriented tasks for collaborative success.

## **General Recommendations:**

1. Self-Awareness:
  - Continuously assess and enhance your self-awareness.
  - Understand how your behavioural preferences impact your interactions and relationships.
2. Adaptability:
  - Cultivate adaptability to navigate different work environments.
  - Embrace opportunities for personal and professional growth.

**Manager's recommendation** [tick public score]

To create a supportive work environment, it's important to provide recommendations for those with high and low DISC scores. Individuals may exhibit a combination of traits, so it's important to leverage strengths and address potential challenges. Below are some suggestions for high and low DISC scores in each dimension. *Tick using individual's public score.*

☐ **High Dominance (D) Score:**

- Leadership Roles:
  - Provide opportunities for leadership roles and decision-making responsibilities.
  - Recognize and reward their ability to take charge and drive results.
- Clear Communication:
  - Ensure clear and direct communication channels.
  - Appreciate their straightforward communication style and encourage them to express their opinions openly.
- Challenges and Goals:
  - Assign challenging tasks that align with their results-oriented approach.
  - Set clear goals and expectations for projects.

☐ **Low Dominance (D) Score:**

- Collaborative Environments:
  - Encourage collaborative decision-making processes.
  - Create a team culture that values input from all members.
- Supportive Roles:
  - Recognize and appreciate their supportive and collaborative contributions.
  - Provide opportunities for teamwork and group decision-making.

☐ **High Influence (I) Score:**

- Team Engagement:
  - Encourage involvement in team-building activities and social events.
  - Leverage their ability to motivate and engage others.
- Client Interactions:
  - Involve them in client interactions and relationship-building efforts.
  - Recognize and reward their ability to connect with others.

☐ **Low Influence (I) Score:**

- Individual Tasks:
  - Allow for individual tasks that don't require extensive social interactions.
  - Recognize and appreciate their focus and independence.
- Structured Communication:
  - Provide clear and structured communication channels.
  - Recognize their preference for more focused and task-oriented interactions.

## **Manager's recommendation** [tick public score]

### ☐ **High Steadiness (S) Score:**

- Team Harmony:
  - Recognize and appreciate their role in maintaining team harmony.
  - Provide a stable and supportive work environment.
- Long-Term Projects:
  - Involve them in long-term projects where consistency and stability are essential.
  - Consider their preference for routine and predictability.

### ☐ **Low Steadiness (S) Score:**

- Adaptability:
  - Provide opportunities for dynamic and fast-paced tasks.
  - Recognize their adaptability and ability to handle change.
- Varied Projects:
  - Assign tasks that require flexibility and adaptability.
  - Consider projects that involve innovation and change.

### ☐ **High Conscientiousness (C) Score:**

- Detail-Oriented Tasks:
  - Assign tasks that require attention to detail and precision.
  - Recognize and appreciate their commitment to accuracy.
- Clear Guidelines:
  - Provide clear guidelines and expectations for projects.
  - Recognize their systematic and organised approach.

### ☐ **Low Conscientiousness (C) Score:**

- Creativity and Innovation:
  - Encourage creativity and innovation in tasks.
  - Recognize their ability to think outside the box.
- Flexibility:
  - Provide flexibility in task execution.
  - Allow room for adaptability and experimentation.

## **Overall Recommendations:**

- Team Dynamics:
  - Foster an inclusive team culture that values diversity in behavioral styles.
  - Encourage open communication and mutual understanding among team members.
- Ongoing Feedback:
  - Provide regular feedback and recognition for individual contributions.
  - Conduct regular check-ins to assess well-being and job satisfaction.
